

REMARKS

In response to the restriction requirement dated June 29, 2005, Applicants elect to prosecute formula (Y-1) for each of  $Y_1$  and  $Y_2$  and the fifth compound in the first row of the compounds listed in claim 3 and shown on page 65 of the original specification for each of  $[Ar_1]$  and  $[Ar_2]$ . A copy of original page 65 of the specification is attached with handwritten numbers to number the compounds from 1-12 for purposes of identifying the elected compound. These elections are without traverse.

Claims 1, 2, 4, 5, 6, 8, 9 and 10 are readable on the elected species.

Further pages 7 and 28 of the specification and claim 3 are amended herein to correct an obvious error in the structure of formulae 4, 5 and 6 (as numbered from 1-12, for example, in the attached copy of the original page 65 for purposes of identifying the compounds being corrected) of the  $[Ar]$  compounds. Specifically, each of compounds 4, 5 and 6 of the  $[Ar]$  compounds in the original specification contain an oxygen atom bonded to a carbon atom with a triple bond, which has been corrected to a double bond. Those of ordinary skill in the art will readily recognize the correction as appropriate to correct an obvious error. Thus, no new matter is presented. Accordingly, claims 1-10 will be all of the claims pending in the application upon entry of the amendment.

In view of the above, reconsideration and allowance of this application are now believed to be in order, and such actions are hereby solicited. If any points remain in issue which the Examiner feels may be best resolved through a personal or telephone interview, the Examiner is kindly requested to contact the undersigned at the telephone number listed below.
